

## **Road Smart: A Customizable Driver Education Program**

Our customizable driver program consists of one or more courses you choose from the following list. Remember, training is available at our location or yours.

**Zone Control (Road)** - The road portion of our 'Zone Control' course consists of in class training and actual road training. During the course, the instructor will review the importance of driving, how to drive properly, stopping distance, etc. After completing the classroom portion of the course, our instructor will take students on the road to review things learned in class.

**Zone Control (Skid)** - The skid portion of our 'Zone Control' course consists of in class and a closed course training. During the course, the instructor will review the importance of driving, how to drive properly, stopping distance, how to control a skid, etc. After completing the classroom portion of the course, our instructor will take students to a closed course to review things learned in class and focus on controlling skids.

**Winter Drive (Skid)** - Do your employees know how to drive during the harsh winter weather? Do they know what to do when their vehicle slides out of control? Well, this course is designed for those situations. With our winter driving course your employees will know what to look for in the winter weather and how to drive properly on the snow and ice packed roads, as well as what to do if they lose control of their vehicle. This course consists of in class room and behind the wheel training.

**Skid Demo** - Our 'Skid Demo' consists of our instructor coming to your location and giving you a short demonstration of our 'skid car' and training tools.

**Tires 101** - Tires, one of the most basic but most important part of a vehicle are often the most overlooked and neglected part of a vehicle. Learn how to properly maintain your fleet of vehicles. Tires 101 deals with: Inspection. When to replace. Choosing the right tire for the job. Repairs. Tire inflation. Tire nomenclature. Tire facts.

**Road Assessment** - Our instructor comes to your location, reviews your current driver training program and assesses the need for other driver training. Our instructor would also be available to do a ride along with employees to conduct a driver assessment and inform the driver of what needs improvement when it comes to their driving.

**Road Smart Training Manager** - With our 'Road Smart Training Manager' you'll never have to worry about tracking your employees driver training again. After completing our courses we will maintain the training records and inform you three months prior to your employees trainings expiration date.

**NSC DDC 4** - DDC-4 is a fast-paced, four-hour classroom program that also makes for an ideal refresher course. Focusing on the importance of attitude in accident prevention and avoidance as

well as the good driving skills students already have, DDC-4 shows the consequences of poor choices made behind the wheel—and puts defensive driving into a personal context. No other driver improvement course is more widely used by businesses and industries, courts and government agencies, state departments, municipalities, driving schools and the military.

**What you will learn:**

- Superior strategies to prevent collisions and citations
- Coping strategies for dealing with road rage, impaired drivers, high-speed drivers and other dangers on the highway
- The know-how for evaluating and improving driving skills after mapping-out a personal skills inventory
- The serious consequences of fatigue, distracted driving, emotional impairments and other risk factors
- Why vehicle malfunction and poor maintenance contribute to collisions

**Course description:** With this popular four-hour course, participants receive practical strategies to reduce collision related injuries, fatalities and costly repairs. This course stresses the importance of attitude in crash prevention and reinforces good, sensible driving skills that participants already have. Most importantly, it clearly demonstrates the consequences of the poor choices drivers make behind the wheel. This half-day course emphasizes the importance of keeping our roads safe.
